Recommendation Letter

For Miguel Monteiro, to whom it may concern.

I am writing to give my strongest recommendation for Miguel Monteiro. Having served as Team Leader at Formula Student FEUP, **I worked alongside Miguel daily for two full years**. I was involved from his initial recruitment interview through his growth into a key member, later department leader, and a primary driver behind our team's development - including non-technical tasks such as the development of two Business Plan Presentations.

From the start, his **relentless work capacity and attention to detail** emerged from others. Working side-by-side with Miguel every day gave me a front-row view to his development; through his commitment and deep technical discipline. He established himself as a **true technical reference** within the team for mechanical engineering and design practices.

Beyond his engineering expertise, Miguel is **exceptionally well-rounded**. He **communicates clearly** across different levels: whether discussing design concepts with department members, presenting them to judges in competitions, or even with manufacturers. When he took charge of co-leading and presenting our Business Plan Presentation, his preparation, communication skills, and composure under judge evalutation were decisive. Thanks to his contributions, our team earned multiple top titles and awards in the BPP competition category.

Miguel brings a **rare combination of technical mastery, work ethic, and clear communication**. After working with him, I know firsthand how dependable, thorough, and capable he is.

He will be an **outstanding asset** to any engineering team or organization he joins.

Please feel free to reach out if you would like any further details about his work.

Sincerely,

Miguel Damião
FS FEUP Ex-Team Leader
