Dear Recruitment Manager,

I am writing to recommend Miguel Monteiro for the position he is being considered for.

As a former member of Formula Student FEUP, I worked closely with Miguel in the Chassis Department for two years during the development of our team's second prototype.

From the outset, we were entrusted with designing the car's frame and mounting points. Despite being only a second-year student, Miguel demonstrated exceptional dedication, independently learning the skills required to design critical components, including tractive system accumulator mounts requiring finite element simulations and analytical calculations he had not yet learned academically. Within less than year of joining the team, he had also fully developed a steering rack support using topological optimization, which was successfully manufactured and praised by competition judges.

Later, as department leader, I considered Miguel an absolutely indispensable member. Beyond his technical contributions, he also contacted and established valuable company partnerships that secured essential manufacturing processes for the team, and was always available to help where needed, even outside the department. As a department leader himself, he demonstrated outstanding organizational and management skills, guiding the team through integration, testing, and competition preparation while developing his bachelor's thesis on composite sandwich panel inserts, which he independently proposed and planned.

As an alumnus, I continued to follow the team's progress and was very proud to see Miguel's experience reflected in a space frame chassis design which is among the best I have seen, and a department in which the individual members are excelling in their particular subsystems.

Based on my experience working with Miguel, I feel I am very well placed to recommend him for his technical ability, leadership, character, drive, and professionalism, qualities I am certain he will continue to build upon.

Sincerely,
Tiago Campos
